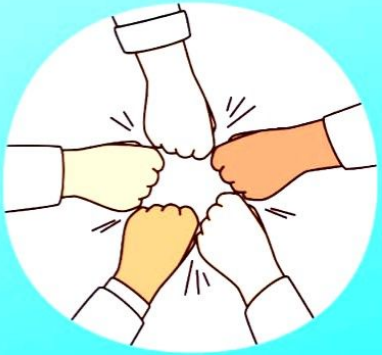
Title: EDUNAVIGATOR

Smart Academic Resource Discovery Platform

Team Name: Trust techies



Team Members:

Meghana Nadendla
Likhitha Irlapati
Anjali kunchala

College Name: Tirumala Engineering College

Problem Statement

Title:Problem view

Students need notes, PPTs, textbooks, and past papers during exams.

These resources are scattered across multiple platforms.

Students waste time searching instead of studying.

Difficult to find reliable and syllabus-aligned content.

No centralized platform exists to organize all academic resources in one place.

As a result, students struggle to quickly access the right materials when they need them most.

Students need a single, reliable platform to quickly discover syllabus aligned academic resources.

User Analysis

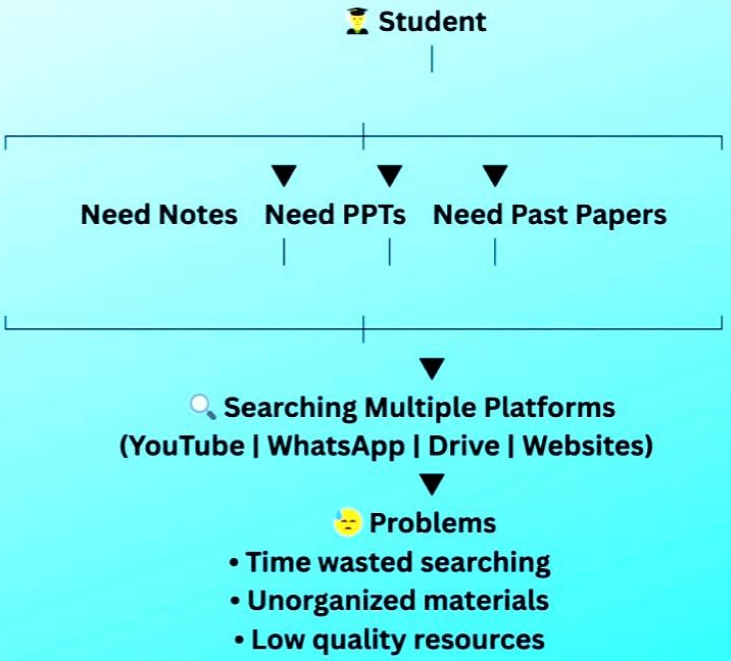
Title: Understanding Student Needs

Students want :

- Quick access to notes
- Subject-wise materials
- Past exam papers
- Short explanations

Pain points:

- Too many sources
- Unorganized materials
- Low-quality resources



Proposed Solution

Title: EDUNAVIGATOR

A Smart Platform to Discover Academic Resources

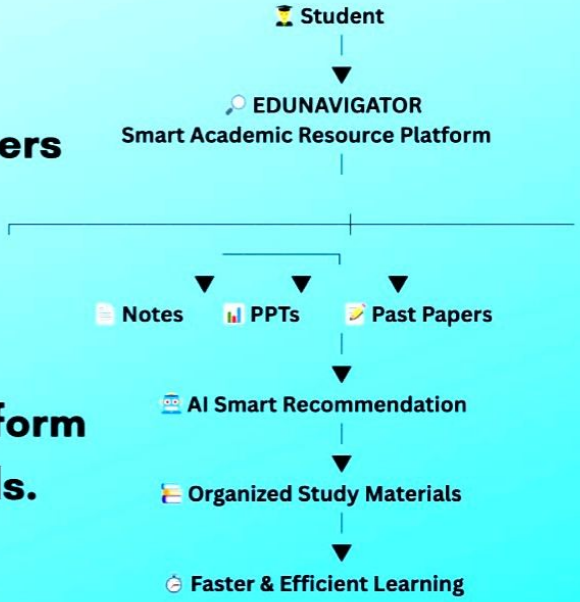
Centralized platform for academic resources

Smart search for notes, PPTs, and question papers

AI-based recommendation system

Organized and syllabus-aligned materials

EDUNAVIGATOR provides a single, reliable platform for students to quickly access study materials.



System Architecture

Interface for students

Backend processes requests

AI recommends best resources

Database stores study materials

Stores academic resources and user data securely.

Ensures secure login and user access control.

Architecture supports adding more resources and users in the future.
